## INTRODUCTION AND SYNOPSIS

This is a chronology—an historical timeline—of Wamboin and District. A dictionary definition of a chronology is ‘the arrangement of events or dates in the order of their occurrence’. You can access the latest edition of this document at the Wamboin Community Association’s website <https://www.wamboincommunity.asn.au/localhistory/>. It is updated as new information comes to hand.

Current research suggests that Aboriginal people were the custodians of the lands that we call Wamboin and district for some 20,000 years (and possibly much longer) before Europeans first visited the area. Tobler *et al.* (2017) present evidence ‘... that the settlement of Australia comprised a single, rapid migration along the east and west coasts that reached southern Australia by 49-45’ thousand years ago.<sup>1</sup>

Apparently, no historical documents, nor recorded oral history, exist clarifying what these traditional custodians called themselves, nor what they called their language. We do know, however, from scholarly linguistics research covering the National Capital region more broadly (especially Koch 2009 & 2010), that their language was similar to, if not identical to, that of the Monaro people: the *Ngarigu/Ngarigo* language, and *Ngarigu/Ngarigo* was apparently the name the Monaro people called themselves.

The first Europeans to traverse Wamboin and Bywong were Charles Throsby, Joseph Wild, James Vaughan and two Aboriginal guides whose names are not recorded, in October 1820. Governor Lachlan Macquarie was visiting Lake George at this time to meet up with Throsby, and to reach (‘discover’) the Murrumbidgee River that Throsby had been told about by Aboriginal people in the Goulburn area.

A project to survey the whole of New South Wales commenced in 1825. The plan was to divide the State into counties and parishes to facilitate land administration. The boundaries of the parishes were set by draughtmen in Sydney, reflecting information received from surveyors. They largely followed the boundaries of already surveyed parcels of land, and natural features such as rivers and mountain ranges.

It is likely that the initial boundaries of the parish of Wamboin were set sometime between November 1864 and February 1866, although the first map of the parish was not published until 1881. ‘Wamboin’ is the anglicised form of a Wiradjuri word for grey kangaroo: ‘wambuwuny’, pronounced wam-bu-woin. It was probably assigned by the draughtsman who set the boundaries of the parish prior to the land being fully surveyed, perhaps on the recommendation of a surveyor. The parish runs from the Turallo Creek to the east, the Yass River to the west, and the boundaries of early land grants in the north and south. In 1981, Wamboin was officially designated as a ‘geographical name’.

In 1825, Captain Richard Brooks received a large land grant at the southern end of Lake George, that he named *Turallo* and, by 1828, William Guise was running stock at his ‘Bywong’ (Sutton) property, and far beyond, presumably into Wamboin and district. Some land grants were made in the area from the 1830s, and most of the land of Wamboin and district was alienated as small selections (40-60 acres) in the 1870s and 1880s. Over the years, many small selections were found to be unviable, owing to their small size, and the land was consolidated into the hands of a small number of pastoralists.

<sup>1</sup> The body of the Chronology provides the sources of information found in this synopsis, including literature references.

Short-lived, but productive, gold rushes occurred at Brooks Creek (in 1861), Mac's Reef/Newington (1865-66) and Bywong (1895). Wamboin's Wyanga school commenced operating in 1871. It was located between Reedy Creek and Weeroona Road, Wamboin. Amungula school (named Woodfield until 1908) operated, on the Bingley family's 'Woodfield' property, Sutton Road, between 1888 and 1913. Other schools operated at Bywong.

With the passage of the *Local Government Act 1906* (NSW), the Yarrawlumla Shire was proclaimed, and Yarrawlumla Shire Council was created, with its headquarters in Queanbeyan. This was a disappointment to the people of Bungendore who had expected it to be built there, thus boosting the town's status and resources.

In 1909, the NSW Government transferred land to the Commonwealth for the creation of the Federal Capital Territory. This did not involve any changes to the boundaries of the parish of Wamboin, but it did to the adjacent parishes of Goorooyarroo, Amungula and Majura.

In 1969, the place name 'Bywong' was gazetted. The area was previously known as 'Geary's Gap', though this was not an official geographical name for the locality.

2004 saw the dissolution of Yarrawlumla Shire Council and the proclamation of the Eastern Capital City Regional Council. Its name was changed eight months later to Palerang Council which was, in turn, dissolved and amalgamated with the Queanbeyan City Council in 2016 to create the Queanbeyan-Palerang Regional Council (QPRC).

The subdivision of the pastoral land and forested country to create Wamboin commenced with an application to Yarrawlumla Shire Council in Nov. 1968 by the Canberra-based developer David Trend Pty Limited (subsequently renamed as Majura Heights Pty Limited); 'Majura Heights' was the name proposed for the subdivision. It was for 10 five/six acre lots between Sutton Road and the longitude of what is now Fernloff Road, an area of 267 acres (1 km<sup>2</sup>). The land subsequently passed to Taywood Hughes Pty Limited, and then to Norton Tower Pty Limited. The first advertisement published in the *Canberra Times* for the blocks in what became known as Wamboin, then called 'Canberra Country Estate' by the developer Norton Tower Pty Limited, occurred in Dec. 1972. It was the land along Norton Road from Sutton Road to Fernloff Road. Further subdivisions were made as the years progressed.

In 1980 Council officially adopted the name 'Wamboin' for the area, and the following year the Geographical Names Board of NSW formally named the locality as Wamboin. (A 'locality' is the rural equivalent of a 'suburb' in an urban area.) The boundaries of the locality of Wamboin differ from those of the parish of Wamboin.

In 1985, the newly built Wamboin Community Hall was officially opened and, in 1998, the newly constructed St Andrew's Anglican Church, was consecrated.

In late 2008 the Wamboin locality entrance sign on the corner of Norton and Sutton Roads was built by Wamboin local Dave Argaet, and his team, under the auspices of the Wamboin Community Association. On 23 January 2023, an ACT-registered car crashed into it, badly damaging the northern end. It was repaired by members of the Argaet family the following January. A time capsule was installed inside the stonework.

December 2022 was the 50<sup>th</sup> anniversary of the foundation of Wamboin as a rural/residential area. No local events were held to commemorate the occasion.

## THE CHRONOLOGY

Date	Occurrence/comment	Sources
c. 444 million years ago	Late Ordovician geological period. Huge volumes of sediments (turbidites) deposited into the deep ocean far off the east coast of the Gondwana mega-continent. Subsequently folded and metamorphosed into the quartz-rich sandstone, siltstone, and shale that we see over most of Wamboin and district today.	Finlayson, D. M. c. 10-5 million years ago	The tectonic elevation of the Cullerin Uplift/Cullerin Horst during the Late Miocene to Early Pliocene epoch. The downcutting of the Molonglo River gorge kept pace with the uplifting of the lands. The eastern escarpment of the Cullerin Horst blocked the flow of Allianoyonyiga, Taylors, Butmaroo & Turallo Creeks to the Yass River through Gearys Gap, creating Lake George/Weereewaa.	Finlayson, D. 1813	Passage across the Blue Mountains found by Blaxland, Wentworth & Lawson, along with their guide James Burn, and four convicts. Aboriginal people had crossed the Great Dividing Range for millennia prior to the arrival of the British settlers.	
1820	Charles Throsby (1777-1828) led a convict party to build a cart road from the Picton area to what is now the Goulburn area, to connect with the newly found route to Bathurst, that would cross the 'Southern Barrier', an easier route to Bathurst than the Blue Mountains crossing. 1820, Aug	The peak of the Sydney influenza epidemic's devastating impact on mortality rates among the Aboriginal people of the Sydney region, the Southern Highlands and, by extension, the Wamboin district and further inland. 1820, 19 Aug	Joseph Wild (1773–1847) and party left Throsby's road construction gang, travelled south, and became the first non-Aboriginal people to visit Lake George/Weereewaa.	Mayer, W 2000, 'In search of a "considerable river": retracing the paths of the early explorers to Lake George, the Limestone Plains and the Murrumbidgee', <i>Canberra Historical Journal</i> , New Series no. 45, pp. 15-24.
1820, 27-28 Oct	Charles Throsby, Joseph Wild, James Vaughan and two Aboriginal guides whose names are not recorded, traversed Wamboin and Bywong. Route: from the eastern side of Lake George, crossing Turallo Creek, west over the Lake George Range, through what is now the south-eastern part of the locality of Wamboin, to the headwaters of the Yass River in Wamboin, followed the river to the west then north to its junction with Brooks Creek, east along Brooks Creek to Gearys Gap, descended to the lake, south along its western shore then north along the eastern shore to the expedition's starting point.  Governor Lachlan Macquarie was visiting Lake George at this time to meet up with Throsby, and to reach ('discover') the Murrumbidgee River that Throsby had been told about by the Aboriginal people in the Goulburn area. 1820, 25 Nov	Owing to drought (1818-1820) and a severe grasshopper plague in the Cumberland Plain, with extensive stock losses owing to lack of feed, upon his return to Sydney, Governor Macquarie issued an Order to extend 'temporary relief' to settlers, permitting them to take their cattle and sheep into the 'New Country' as far as	Perry, TM 1963, <i>Australia's first frontier: the spread of settlement in New South Wales, 1788-1829</i> , Melbourne University

	the Goulburn/Breadalbane area. 'The publication of this Order on 25 November 1820 marked the real beginning of the great outward spread of pastoralists and graziers which continued into the thirties and forties. It was, however, different from the squatting movement of those decades, though the distinction is more one of legal status than of grazing techniques. Unlike the squatters, these people moved into unoccupied areas with the government's permission, if not its whole-hearted approval.'	Press in association with the Australian National University, [Carlton, Vic.], p. 33.
1820, Dec	Charles Throsby Smith 1798–1876, Joseph Wild, Constable James Vaughan, and apparently some others, travelled from the Lake George east shore, Lake Road, Gearys Gap, Brooks Creek, Yass River, Ginns Gap, Limestone Plains. 1821, Mar	Charles Throsby and Joseph Wild returned to Lake George, travelled south and west to the Molonglo River, and followed it through the Molonglo Gorge to the Limestone Plains, the subsequent location of Canberra. 1821, 1 Dec	Governor Macquarie's farewell speech, on departing the Colony, began with 'Fellow citizens of Australia!'	<i>Sydney Gazette</i> , 1 December 1821 p. 2a-b.
1822, 30 Jan	First map to show part of what became the Parish of Wamboin. Compiled by NSW Surveyor General John Oxley. 1824 (possibly earlier)	Sydney-based Captain Richard Brooks (1765–1833) established the 'Bungendow'/'Bungandow' property (including 'Turalla'), the most southerly inland location at which the colonial settlers had taken up land at that stage. In 1 Dec 1824 he was 'Allowed temporary occupation of land at the southern end of Lake George for use as a grazing run'. It subsequently became a land grant of 4,000 acres.  Writing in 1896, Stewart Mowle, who had a fine command of the local Aboriginal language, emphasised that the name of the locality was pronounced 'Bungendow'—subsequently Anglicised to 'Bungendore'. 1824	<p>It has long been accepted that, probably near the end of the year, the first European settlement on the Molonglo River occurred: crown land was occupied there, prior to survey, by employees of Joshua John Moore, the Prothonotary of the Supreme Court of NSW (e.g., Watson 1931).</p> <p>McDonald (2021), however, has presented a strong argument that, in the May-July period, Owen Bowen established his ‘Molonglo’ dairy-cattle run at the Molonglo Plain [Carwoola], so his was the first European settlement in the greater Canberra region, not Moore’s.</p>	<p>Watson, F 1931, ‘Special article - Canberra past and present’, in <i>Official year book of the Commonwealth of Australia</i>, no. 24-1931, ABS cat. no. 1301.0, Commonwealth Bureau of Census and Statistics, Canberra, p. 458.</p> <p>McDonald, J 2021, ‘A new chronology for the first pastoral stations on the Molonglo, Part 1: Canberry’, <i>Quinbean</i>, vol. 14, no. 2, pp. 24-36.</p>
1825	‘In 1825 Governor Brisbane was ordered to undertake a general survey of the colony of New South Wales and break it up into counties for the purpose of land administration. Each county was to be divided into parishes, the boundaries of which were fixed by convenience such as following the border of surveyed land or natural features like rivers.’	Land and Property Information (N.S.W.) 2013, <i>Historical parish maps</i> , Land and Property Information, Sydney, p. 1, <a href="https://rg-guidelines.nswlrs.com.au/Home/fact_sheets">https://rg-guidelines.nswlrs.com.au/Home/fact_sheets</a> .
1825	First European settlement at Gundaroo. Gundaroo subsequently became the village serving the settlers in Wamboin and district before a road to Bungendore was built.	Lea-Scarlett, EJ 1972, <i>Gundaroo</i> , Roebuck Society Publication no. 10, Roebuck Society, Canberra, p. 3.
1826-1829	Severe drought in the colony led graziers to move from Sydney to the inland seeking viable pastures for their stock, ‘accelerating colonisation’.	e.g. McDonald, J 2023, <i>Canberra II: colonisation (1824-61)</i> , Sorley Boy, Melbourne. p. 46.
1826, 5 Sep	<p>‘By a Government order on 5 September 1826 Governor Darling created an area known as the “limits of location”. Settlers were only allowed to take up land within this area.</p> <p>‘A further Government order on 14 October 1829 increased this area of approved settlement to include an area called the Nineteen Counties.’ The area that Wamboin and district now occupies lay inside the south-western edge of the Nineteen Counties, as the Murrumbidgee River constituted the boundary.</p>	NSW State Archives & Records n.d., Crown Lands Occupation Guide, <a href="https://www.records.nsw.gov.au/archives/collections-and-research/guides-and-indexes/crown-lands-occupation-guide">https://www.records.nsw.gov.au/archives/collections-and-research/guides-and-indexes/crown-lands-occupation-guide</a> .
1827	‘In 1827, the Bungendow run [including what became Brooks’ ‘Turalla’ property] affected by a severe drought which soon became prolonged, forcing the district’s stockmen to look for new pastures for the starving animals’ in the Monaro district.	Maher, C 2016, <i>Richard Brooks: from convict ship captain to pillar of early colonial Australia</i> , Rosenberg, Kenthurst, NSW, p. 193.

1828	William Guise (1797 - 1850) running stock at his 'Bywong' (Sutton) property, and far beyond. 1828, May	Robert Dixon undertook the first survey of the area, a feature survey only. 'Dixon's survey in 1828 and 1829 permitted the proclamation in October 1829 of the Country ( <i>sic</i> ) of Murray, the area within a radius of about thirty-five miles of where the town of Queanbeyan later developed' (p. 4).	Lea-Scarlett, EJ 1972, <i>Gundaroo</i> , Roebuck Society Publication no. 10, Roebuck Society, Canberra.
1828, Aug	Surveyor General Major Thomas Mitchell and surveyor Robert Dixon established, at the north-west part of Lake George, the first baseline for a trigonometrical survey of NSW, enabling them to produce the first accurate maps of the colony. It was one mile in length, measured using two tent poles as the datum. The baseline can be seen at the north-west extremity of Lake George, marked as 'Base', in Mitchell's 1834 map of the colony (see below). A paper presented to the N.S.W. Lands Department Staff Surveyors' Conference, 1967', <i>The Australian Surveyor</i> , June, 1967, p. 137.
1828, Nov	The first census of the Colony of NSW. 'The NSW Census of 1828 recorded that there were 126 persons living at twenty different places in the County Murray, although the boundaries had not been officially defined. At Captain Richard Brook's Bungandow (Bungendore) property eighteen people were employed, and Bowen and Balcombe on the Molonglo River had another thirty' (p. 16). 'The 1828 Census recorded that of the 126 persons living in County Murray, 73 were convicts and by 1836 50% of the population were convicts, that is 864. This created an uneasy situation between those who were free and those who weren't' (p. 18). 1829, 14 Oct	Notification of the initial boundaries of the County of Murray. The northern boundary of the county was a line running east-west through Gearys Gap, some 20 km south of its current border which is near Collector.  The county was named after Sir George Murray (1772-1846), the British secretary of state for the colonies.	<i>Sydney Gazette and New South Wales Advertiser</i> , 17 October 1829, p. 1, <a href="http://nla.gov.au/nla.news-page497917">http://nla.gov.au/nla.news-page497917</a> Australian Dictionary of Biography (ADB) 1967, <i>Murray, Sir George (1772-1846)</i> , ADB, National Centre of Biography, Australian National University, Canberra.

1831	NSW crown lands first disposed of by public competition (auction). The practice of making land grants free of charge ceased. 'Following this, land was sold by public auction without restrictions being placed on the area to be acquired. After 1831 the only land that could be made available for sale was within the Nineteen Counties. This restriction was brought about to reduce the cost of administration and to stem the flow of settlers to the outer areas.' 1867, Jan	Government Surveyor George Robarts ( <i>sic</i> ) Smalley (1822–1870) received instructions to measure, at Lake George, a new baseline for the trigonometrical survey of the colony, a more accurate one than that measured by Mitchell in 1828. It was completed in 1869, on what are now the 'Lakelands' and 'Turalla' properties. A huge flood in 1870 covered the baseline, so Surveyor General Philip Francis Adams (1828–1901) measured a new one, above the flood level, about half a mile east of Smalley's, which was also flooded. On 2 January 1873 the marking of a third and final line was commenced, and it was completed on 31 Jan 1874.  The North Base and the South Base can be seen in Google Earth and other satellite imagery at -35.167400, 149.472107 and -35.237701, 149.423706, respectively. 1867, 18 Oct	'An inquest was held on Friday, the 18th instant, at Creekboro, near Bungendore, before Dr Morton, district coroner and a jury of twelve, upon view of the body of Austin Smith, then and there lying dead. We take the following particulars of the sad occurrence which caused his death from the evidence :—Deceased was fifteen years old, and was with an elder brother on the previous day riding in the bush collecting horses. Deceased was riding a quiet horse but when the accident occurred was galloping after some horses in open forest land. For a few minutes his brother lost sight of him, and then discovered him under a tree lying on his side. Deceased was pale, his breathing was hard and quick, and he complained of being hurt all over. He also said the horse fell over on him. No blood came from any part of the body. His brother ran to Mr Byrne's for assistance, and afterwards for his father. Deceased died where he lay, in about three-quarters of an hour after the occurrence, and while Mr Byrne was with him. The jury returned a verdict that deceased died from injuries received by falling from his horse.'	Fatal accident at Bungendore', <i>Queanbeyan Age</i> , 26 Oct 1867, p. 4.

1871, 15 Dec	A massive aerolite—a meteorite made of stone—was seen and heard across the region. 'Last Friday, soon after midday, a noise like thunder, or the report of a cannon followed by reverbrations ( <i>sic</i> ), was heard in Queanbeyan, but as the sky was at the time perfectly free from thunderclouds it was thought by some who heard it that the report was that of an earthquake, although no agitation of the earth was felt ... 'The late John Finn, originally owned the block on the corner of Bingley Way and Norton Road. The block which is only 2.1 acres, was zoned for a shop and residence. We thank you in advance for your understanding.' This followed an audit some months earlier, conducted by the NSW Audit Office, that found that the NSW Government, and the responsible department, had failed in many aspects of basic project management (as the Wamboin Communications Action Group put it). In this context, 'descoping' meant cancelling the project. Community members were furious. 2025, c. May	South East Local Land Services emailed some residents of the Wamboin & Bywong area advising that, prior to the release locally of the Rabbit Haemorrhagic Disease Virus (RHDV), seroprevalence testing was conducted across the Queanbeyan-Palerang region to establish viability of this biocontrol vector. 'The results indicated a high level of seroprevalence among feral rabbits within the region, meaning that many rabbits have already been exposed to and developed antibodies against RHDV. Given this, further use of the virus as a biocontrol method is not recommended in the area at this time, as its effectiveness would likely be minimal.'
